

# DINCEL STRUCTURAL WALLING

---

PLASTERBOARD INSTALLATION

## Plasterboard Fixing to PVC Formwork

FIG 1: ADHESIVE FIXING DETAIL

Fixing layout table	
Fixing specifications	Horizontal sheeting
Screws	No.6 x 25mm type W plasterboard screws
Butts & corners	Screws at 400mm max. centres
Recesses	Screws at 666mm max. centres
Field	Gyprock Acrylic Stud Adhesive in horizontal or vertical bands 100mm nominal width at 666mm max. centres

### Notes:

- PVC walls must be flat. Deviations in straightness will be reflected in the lining, and should not exceed 4mm in any location, measured from a 1.8m straight edge.
- Surface must be free of oil, grease, dust, etc.
- Screws to be located at panel joint voids only.
- Apply adhesive with a 6mm notched trowel.
- Plasterboard to be pushed firmly against wall at adhesive bands immediately after installing.
- Joint treatment and surface decoration is to be in accordance with Gyprock™ Residential Installation Guide. Refer to the Guide for information on lighting conditions, control joints and other design considerations.
- Details are suitable for interior walls in wind zones up to N3, as defined in AS 4055.
- Details are not suitable for wet areas or for walls to be finished with tiles.
- Do not disturb walls for 24 hours after installation.
